WHEEL TRAKS NEWSLETTER

November 2014

Inside This Issue:

DTV Shredder 3

Special Points of Interest:

If you are receiving this newsletter via regular mail and have an e-mail address, please send it to newsletter@TSATV.org.

Please also note that having a registered e-mail address also gains access to the Forum where members can exchange ride ideas, ask questions, and meet new members.

Christmas Around the World

Rob K: The club will be participating in the annual Christmas Parade again this year. Our designated parade spots are 80, 81, and 82. We are meeting for the lineup on Friday, November 28 at 6:30 pm on 3rd Avenue immediately West of 22nd Street. This year, Chet is our parade coordinator. Members, please consider joining us, decorating your machine, and bring a small trailer if you have one for the stuffed animals. Note that although you can dress up, no one can dress up as Santa per the parade guidelines.

Chet is still collecting stuffed animals if you haven't had a chance to donate them. However, any donations at this time have to be new since there will not be enough time to wash any more before the parade.

If you're interested in joining us in the parade and were not at the last club meeting, please reply to this e-mail so we can get a better count of people that will be attending. Also please respond if we need to schedule a pickup of last minute stuffed animals. Additionally, if you or anyone else is interested in being one of our elves this year to help distribute the animals to the children, please respond so we can get you connected.

Stay tuned to [the Forum](#) or our [Facebook page](#) for updated information. Thanks again and we look forward to seeing you there!

Amazing DTV Shredder – New Breed of Extreme ATV

What do you get if you combine a skateboard, a jet ski and ATV? That would be the DTV Shredder, a new toy for power sports enthusiasts created by BPG Werks.

Designed to appeal to a variety of extreme sports fans, the Shredder is a personal vehicle unlike any other you've seen before. The steering

is done via a skateboard-like platform mounted on top of two sturdy treads, by leaning into the direction you wish to go, while the handlebar offers much needed stability. The board is the only component that moves, while the rest of the machine stays fixed to your body. It has a 196 cc, 4-stroke gas engine, patented dual-CVT drive system that keeps you from having to shift gears, 13 horse-power and a top speed of 30 mph. The guys at BPG Werks say they limited the Shredder to 30 miles per hour because that's the top speed most people feel comfortable at standing up. After that, it's just plain scary. Weighing just 200 lbs., the DTV Shredder can be folded and fits in the trunk of a medium-

size truck, which makes it more practical than motocross bikes or ATVs. It can be ridden all year long, on any kind of terrain, unlike most other power sport vehicles.

It might look like a Segway on steroids, but according to Ben Gulak, the CEO of BPG Werks, the DTV Shredder is more like a crossover between skateboard and motocross bike or ATV, the best of both worlds in one compact package. Its makers say it works on all kinds of terrain, including deep powdered snow and

the sealed carburetor allows it to cross water of depths up to 10 inches (25 cm). The all-mechanical vehicle was originally presented in 2010, but only hit the market early this year, with a price tag of \$3,999. Not too bad for an all-terrain vehicle.

The Shredder has apparently attracted the attention of the Crown Prince of Dubai, who ordered two custom vehicles equipped with 40-hp rotary engines that can go as fast as 60 mph. The rest of us will just have to settle for 30 mph.
